REV IT UP!

From the Desk of RJ

Finished!

Hello All,

I always wanted an old gas pump to have on display here at the shop. I finally bought one from Mike Hoyt years ago, and it's been around the shop for probably 10 plus years...

So, I've taken more than a few pokes about "when you gonna get that finished up?" My son, Matt, put the pressure on me to finally get it completed and on display in 2016. He worked through the final assembly, Jason completed the paint work on the project and here are the final result photos with our staff.

This pump is from the late 1920s and was in need of a full restoration when I purchased it.

Thanks to all my staff who helped bring it back to life!

1968 Dodge Charger R/T

Currently under assembly in our shop is Tom Seaney's black on black 1968 Charger R/T.

Black is always a tough one, because it needs so much prep work and finesse to make it really nice!

This one hit the mark, after many painstaking hours in the RJ CARS body shop bay under the care of CJ Tremper.

The car has a 440 4 bbl. engine, 727 console shift automatic transmission, Rallye dash, air conditioning and power windows.

Tom has plans to install Torque Thrust D wheels and we should have it rolling on those very soon!

We just finished the vinyl top and headliner installations and the glass/trim is being installed now.

Watch for our final photo shoot to be on our website Photo Gallery, Facebook page and in upcoming newsletters.

1959 Cadillac Coupe DeVille

Long time repeat client Chris Santomero is pulling out all the stops to bring this family owned 1959 Cadillac back to life.

We are performing a complete off the frame restoration and plans are to take the car back to it's original light blue paint, with a blue interior and blue tinted glass.

Chris always sends some challenging projects our way. The mammoth size of this car and the long list of chrome, trim work and details to complete this restoration project may very well top that list.

Watch the RJ CARS website photo gallery and future issues of our Rev It Up Newsletter for updates as we work through this big finned classic!

1970 AAR Cuda

John Skok grabbed this AAR Cuda project car way back around 1980 with 37,000 Miles on the odometer.

He set it aside until 2016 when he pulled it out of storage and trailered it over to our shop to be rotisserie restored.

The car hasn't been registered since 1977 and was quite a time capsule, but had been partially stripped/disassembled when John took possession of it.

FK5 Dark Burnt Orange Metallic exterior paint with a white interior and a console shifted 727. Sure will be a nice one when it's all assembled!

Thanks to John and his wife Sylvia for entrusting us with their treasured classic!
